

I request that you do not give LPFM priority over FM translator service. Specifically, I listen to K-Love out of Georgetown, KY. I think it is important to have clean, quality programming available which KLOVE provides. If they lose the ability to transmit, I will be out of good decent programming. As the only music I listen to is Contemporary Christian, this would effectively put me out of the radio market. It would effect hundreds of other listeners as well, in not only the Maysville community, but in the surrounding area that the Georgetown transmitter serves. Just last night a group was talking about how much we enjoyed KLOVE and how glad we were to have it now available in our area. Please do not do anything that will destroy our potential for decent music. I believe it is in the public interest that we are able to keep our programming, and my understanding is that if the LPFM is given priority, the public is endanger of losing this programming.
